(54) 【考案の名称】 ゴルフ記録用紙およびその収納ケース

(57) 【要約】

【課題】 プレー当日の状況が詳細に記録されると共にその記録と同時に、資料を見ることでプレー当日の記憶を鮮明に呼び戻すことができ、しかも実戦に即したイメージトレーニングを行うことのできるゴルフの記録用紙およびその収納ケースを提供する。

【解決手段】 ゴルフコースのホール名が表示された標題部2と、ホールの平面図が表示された図面表示部3と、図面表示部3に設けられコースの距離測定用目盛が記入された距離目盛部4と、コースの情報が表示されたコース情報部5と、打数および使用クラブの番手を記入する打数記録部6と、を有し、図面表示部3には、プレーヤが打ったボールの軌跡を記入できる構成とした。

DETAILED DESCRIPTION

---

[Detailed explanation of a design]

[0001]

[The technical field to which a design belongs]

While this design starts the golf record form which records the score of golf etc., and its receipt case, especially a play situation is recorded on a detail, the related data of golf etc. are related with the golf record form which can carry out a vision check, and its receipt case at coincidence.

[0002]

[Description of the Prior Art]

If it participates in the athletic meet and play meeting of golf, the data related to the invitation of an athletic meet, the catalog of a golf course, a pamphlet, the map of a course, or an athletic meet etc. will remain at hand besides the scorecard which recorded the results of play that day. Since it became the good souvenir of play that day, these goods were kept collectively in many cases.

[0003]

[Problem(s) to be Solved by the Device]

However, the most difficult work remembered how it approached from this figure in by what kind of locus its hit ball flew in the detailed situation, especially each hole of a play on the day, and GURINN by the scorecard in the former having only a function as a record form, and only indicating only the figure of a result.

Moreover, since they were gathered suitably and were only kept for every goods, data, such as an invitation and a pamphlet, had to discover each goods and were very troublesome to see the scorecard of play that day, and the goods of other commemoration later.

Moreover, since a scorecard was filed collectively, it tended to become scattering and also had a possibility of losing.

Therefore, the impression of play that day fades, so that time amount passes, and it might be said that neither the results of play that day nor the situation of a course could be remembered with reality.

[0004]

This design was made in view of the above-mentioned conventional trouble, it can see data on the day to coincidence while the situation of play that day is recorded on a detail, moreover, can call back storage of play that day vividly, and offers the record form and its receipt case of the golf which can perform still battle-image training.

[0005]

[Means for Solving the Problem]

The title section as which, as for this design, the hole name of a golf course was displayed in order to solve the above-mentioned technical problem, The drawing display as which the top view of the course for said every hole was displayed, and the distance mark section in which it was prepared in said drawing display and the graduation for range measurement of a course was entered, It has the course information bureau where the information on a course was displayed, and the number-of-times-at-bat Records Department which fills in the yarn count of the number of times at bat and use crab, and is

characterized by the ability to enter the locus of the ball which the player hit in said drawing display. Moreover, said distance mark section is characterized by being prepared on Rhine of the standard course displayed on the perimeter or said top view of said drawing display at least. Moreover, it is characterized by for said two or more sheets of golf record forms and the usual scorecard being filed by one, and forming the booklet.

[0006]

Furthermore, the title section as which, as for this design, the hole name of a golf course was displayed, The drawing display as which the top view of the course for said every hole was displayed, and the distance mark section in which it was prepared in said drawing display and the graduation for range measurement of a course was entered, It is characterized by preparing the 1st stowage where the golf record form which has the course information bureau where the information on a course was displayed, and the number-of-times-at-bat Records Department which fills in the yarn count of the number of times at bat and use crab is contained, the 2nd stowage where the data of golf are contained, and \*\*.

[0007]

[The gestalt of implementation of a design]

Hereafter, the gestalt of operation of the golf record form concerning this design and its receipt case is explained based on drawing.

The perspective view showing the condition that the top view in which drawing 1 shows the golf record form of this design, and drawing 2 used the golf record form of drawing 1 as the booklet, and drawing 3 are the perspective views showing the receipt case which contains the golf record form of drawing 1 .

[0008]

The title section 2 as which the hole name of a golf course was displayed on the topmost part of the sheet of one sheet as the golf record form 1 concerning this design was shown in drawing 1 , The drawing display 3 of this sheet as which it was mostly prepared in the center section, and the top view of the hole concerned was displayed, The distance mark section 4 in which it was prepared in the perimeter of this drawing display 3, and the graduation for range measurement of a course was entered, It has the course information bureau 5 where it was prepared in the lower part of a sheet, and the information on a course was displayed, and the number-of-times-at-bat Records Department 6 which is adjoined and established in this course information bureau 5, and fills in the yarn count of the number of times at bat and use crab.

[0009]

First, the golf course name and the hole name of the golf course concerned are displayed on the title section 2 prepared in the topmost part of a sheet, and the column which fills in the date and the weather of play that day is prepared in the back.

Moreover, top view 3 a of the course of the hole concerned to carry out is printed by the drawing display 3, and Rhine 3b of a model course is beforehand printed thinly by this top view 3 a. And he can enter now locus 3c of the actually hit ball in this drawing display 3. Therefore, the situation of play that day can be vividly remembered by seeing this golf record form 1 after play termination.

[0010]

Although the distance mark section 4 prepared in the perimeter of this drawing display 3 consists of the two distance mark sections 4a and 4a for length, and the distance mark sections 4b and 4b for width, respectively so that the distance in said top view 3 a can be measured, one place is sufficient as distance mark section 4a for length, and distance mark section 4b for width. This distance mark section 4 is possible for graduation \*\*\*\*\* changing this scale unit at a time if needed by 10 yards of 1 graduations. By this distance mark section 4, the situation and physical relationship of a hole can be more correctly grasped now, and it is utility at the improvement in results of a play.

[0011]

Moreover, as the distance mark section 4, it can express as a number as standard flight distance on Rhine 3b of said model course, and the concrete value can also be shown as distance information of the course information bureau 5. Furthermore, the distance from the pin center, large location of Green shows the location of the obstruction on said top view 3 a as fault information of the course information bureau 5.

For example, 200 yards and a pond P1 are indicated to be 180 yards, and a standing tree T1 is indicated [ an ice bunker B1 ] to be 400 etc. yards etc. for 50 yards and ice bunker B-2.

[0012]

The number-of-times-at-bat Records Department 6 is established in the lower part of the course information bureau 5. This number-of-times-at-bat Records Department 5 fills in the shots per hour which the player struck, and the used crab. In a spoon and \*\*, baffly and \*\* a number three iron and \*\* for a number 5 wood and \*\* A number four iron, \*\*, \*\*, \*\*, \*\*10 [ \*\* ] [ a driver and \*\* ] \*\*11 A number nine iron is shown from \*\*\*\*\* of No. 5. \*\*12 A \*\* sand wedge, \*\*13 A \*\* pitching wedge, \*\*14 The \*\* putter is shown. If the column of record of the notation of these numbers is filled in, the number of times at bat and a use crab name can distinguish later also.

[0013]

Moreover, the batting lineup of a player and the block 7 of a score are formed in this golf record form 1, and the batting lineup of a player and a score are entered in it for every hole.

Furthermore, the memorandum column 8 is formed in the bottom of this block 7, and the point and the need matter which he has noticed during a play can be written in now. In addition, the binding margin 9 of a null and two binding holes 9a and 9a are formed in a left end side, and you may make it file this golf record form 1 in the golf record form 1.

Moreover, the layout of the title section 2 mentioned above, the drawing display 3, the distance mark section 4, the course information bureau 5, and the number-of-times-at-bat Records Department 6 is arbitrary, of course in addition to this, that modification of a layout can be performed if needed may add required information, or it may be made to replace information.

[0014]

Thus, since the situation at the time of a play is recorded on the detail for every hole, storage of the play day concerned can revive vividly and the constituted golf record form 1 can be immersed in the feeling of play that day. Moreover, by seeing this golf record form 1, it can carry out by the ability repeating the image training adapted to a battle, and the merit rise of golf can be aimed at.

[0015]

Next, the record form 10 of golf shown in drawing 2 spells two or more sheets of golf record forms 1 mentioned above, and uses them as the booklet of one volume.

The record form 10 of this golf is filed using the binding implement which does not paste up and illustrate the binding margin 9 prepared in the golf record form 1. As for the number of sheets of the golf record form 1 filed by the record form 10 of this golf, it is [ that what is necessary is just to double with the round of a play ] desirable to consider as nine sheets of a half, 18 sheets of one round or 27 sheets of 1.5 rounds, 36 etc. sheets of two rounds, etc.

[0016]

Furthermore, you may make it attach the conventional scorecard 11 currently generally used for this golf record form 10 together. You may make it form this scorecard 11 in the spread of the beginning after cover 10a, or the last spread, as you may prepare in the cover of the record form 10 or it is shown in drawing 2. Moreover, as for facing one side and the object for 1 round, in the object for halves, according to the number of sheets of said golf record form 1, facing both sides should just also make the number of sheets of a scorecard 11 two sheets at facing both sides or two rounds.

[0017]

Thus, since two or more golf record forms 1 (9, 18, 27 or 36 sheets) used at one play are beforehand spelled in order of the course, when using it, it is [ that what is necessary is just to use it in order as it is ] very convenient [ the constituted golf record form 10 ]. Moreover, after use is convenient on storage, without the golf record form 1 dissipating, since two or more filled-in golf record forms 1 are spelled as it is.

[0018]

Below, the receipt case 20 of the golf record form which can contain said golf record form 1 is explained based on drawing 3.

The receipt case 20 of a golf record form is formed in the front face of pasteboard with the sheet made

from plastics, has the 1st stowage 21 which contains said golf record form 1, and the 2nd stowage 22 which contains the data 23, such as an invitation on the day and a pamphlet, and folds it up from a center section, and the spread has come to be able to do it in this drawing.

[0019]

Although two or more pockets 25 doubled with the magnitude of the golf record form 1 in order to contain the golf record form 1 are formed in said 1st stowage 21 and the number is considering as nine pieces with the gestalt of this operation, it can change suitably.

Moreover, the pocket 26 and pocket 27 in which said 2nd stowage 22 contains data 23 are prepared. These pockets 25, the pocket 26, and the pocket 27 are formed from the vinyl of transparence.

[0020]

Thus, since the receipt case 20 of the constituted golf record form can contain nine sheets of golf record forms 1 to the 1st stowage 21 and it can see the data for a half round at once, it does not need to turn over one sheet of record form [ one sheet of ] 1.

Moreover, since the data 23, such as a pamphlet at this time, can be seen to coincidence, the situation at the time of a play can remember skillfully, and can cut to storage fine still more strongly.

[0021]

[Effect of the Device]

The title section on which, as for this design, the hole name of a golf course was displayed to have stated above. The drawing display as which the top view of the course for said every hole was displayed, and the distance mark section in which it was prepared in the perimeter of said drawing display, and the graduation for range measurement of a course was entered, It has the course information bureau where the information on a course was displayed, and the number-of-times-at-bat Records Department which fills in the yarn count of the number of times at bat and use crab. To said drawing display Since the situation at the time of a play is recorded on the detail for every hole by the ability filling in the locus of the ball which the player hit While storage of the play day concerned can revive vividly and can be immersed in the feeling of play that day, the outstanding effectiveness that image training adapted to a battle can be performed is done so.

Moreover, since two or more golf record forms used at one play by said golf record form's using two or more sheet spelling as one booklet, and having filed the usual scorecard together are beforehand spelled in order of the course When using it, since it can be used in order as it is, it is very convenient, and it becomes convenient on storage, without a golf record form dissipating, since two or more golf record forms 1 which swerved also even from after use account ON are spelled as it is.

[0022]

This design furthermore, by preparing the 1st stowage where said golf record form is contained, the 2nd stowage where a photograph or data is contained, and \*\* If one centerfold is seen, since data, such as a scorecard of play that day in one athletic meet or convention, and an invitation of a convention, a map of a course, the comment at that time, etc. are filled in and memo paper is known at a glance The storage of play that day revives skillfully, and does so the effectiveness that it can be immersed in the feeling of play that day.

CLAIMS

---

[Utility model registration claim]

[Claim 1] The title section as which the hole name of a golf course was displayed, and the drawing display as which the top view of the course for said every hole was displayed, The distance mark section in which it was prepared in said drawing display and the graduation for range measurement of a course was entered, The golf record form which has the course information bureau where the information on a course was displayed, and the number-of-times-at-bat Records Department which fills in the yarn count of the number of times at bat and use crab, and is characterized by the ability to fill in the locus of the ball which the player hit to said drawing display.

[Claim 2] The record form of the golf according to claim 1 characterized by preparing said distance mark section on Rhine of the standard course displayed on the perimeter or said top view of said drawing display at least.

[Claim 3] The record form of the golf according to claim 1 or 2 characterized by for said two or more sheets of golf record forms and the usual scorecard being filed by one, and forming the booklet.

[Claim 4] The title section as which the hole name of a golf course was displayed, and the drawing display as which the top view of the course for said every hole was displayed, The distance mark section in which it was prepared in said drawing display and the graduation for range measurement of a course was entered, The receipt case of the golf record form characterized by having the 1st stowage where the golf record form which has the course information bureau where the information on a course was displayed, and the number-of-times-at-bat Records Department which fills in the number of the number of times at bat and use crab is contained, and the 2nd stowage where the related data of golf are contained.
